

oneSAFE®

SINGLE-GLOVE DISPENSING SYSTEM

A **REVOLUTIONARY** FOR **INNOVATION** INCREASED **SAFETY**

A first-of-its-kind innovation in the food industry, our new glove dispensing system enables you to provide a higher level of safety to your foodservice operation. Its ease of use can help significantly reduce the risk of cross-contamination, reduce waste and decrease your operation's environmental footprint.

The oneSAFE[®] design makes it easy to grab only one glove at a time. Because the system allows users to touch the glove only at the cuff, the glove's palm and fingers will not come into contact with the user's bare hands.

IMPROVED HYGIENE

Reduce cross-contamination when putting on and wearing gloves.

REDUCED WASTE

Decrease the amount of gloves that are discarded or contaminated.

DECREASED FOOTPRINT

Compact packaging system reduces environmental impact of transportation and overall logistics.

INCREASED EFFICIENCY

Highly visible, simple, easy-to-access set up can be installed wherever is convenient for staff.

PROTECT YOUR PATIENTS AND YOUR HEALTHCARE OPERATION

The oneSAFE® design makes it easy to grab only one glove at a time. Because the system allows users to touch the glove only at the cuff, the glove's palm and fingers will not come into contact with the user's bare hands. This new dispensing system provides the modularity and operational flexibility needed for long-term care and other operations.

DID YOU KNOW

Healthcare operations spend an average of **\$18,000** to fight one infection.

In addition, the CDC speculates that **handwashing compliance** is only **35–40%**.

SMART.

The oneSAFE® design allows for a greater reduction in packaging and storage space.

SIMPLE.

Dispenses gloves one at a time and allows for users to don up to 50% faster.

SAFE.

Reduce the chance of spreading costly HAI's, protecting both patients and healthcare workers.

MEDHANDLER® ONESAFE® NITRILE EXAM-GRADE GLOVES

- Meets or exceeds 2.5 Accepted Quality Level
